

6516208971.txt

Ladies and Gentlemen,

I am writing to urge you to vote against the NAB's petition 04-160. I am a fan of satellite radio and the enormous variety of its programming. I understand that the NAB is upset that XM, in particular, offers local instant weather and traffic updates to its subscribers.

By voting against petition 04-160 you will demonstrate that competition is what improves service & programming. The NAB is just trying to quash a superior product that will take away some of their market share.

Thank you for taking the time to consider my request.

Sincerely,

Jeff Schaum
